Electric Strikes

1006 Electric Strike

*Works with all cylindrical
and mortise locksets with
or without a deadbolt*

Also available in
a Complete One
Box Solution

The strongest, most versatile electric strike available.

The 1006 Series Electric Strike is the strongest and most versatile electric strike available. The dual interlocking plunger design and heavy duty stainless steel construction enables it to exceed every standard developed for electric strikes. With multiple faceplate options, the 1006 will fully accommodate every lock designed to work within an ANSI 4-7/8" strike plate. Tested to exceed 3,000 lbs of static strength, 350 ft-lbs of dynamic strength and factory tested to exceed 1 million cycles of operation, the 1006 is in a class of its own.

Features

1500 Electric Strike

*Works with most brands
of cylindrical and mortise
locksets without a deadbolt*

Also available in
a Complete One
Box Solution

The most advanced, modular electric strike that works with most brands of cylindrical or mortise locks designed to work with a 4-7/8" strike plate.

The 1500 Series Electric Strike sets a new standard in the industry by offering dynamic integrated adjustability and field configurable options compatible with any cylindrical or mortise lock. The modular design of the platform makes stocking and installing easier with interchangeable faceplates and accessories. For the first time, the aesthetics of an electric strike are complementary to other surrounding door hardware and blend in with the opening due to the fully finished design, available in eight finishes.

- Estimated Battery Life: 45,000 Cycles*
- (2) “AA” lithium batteries (included)
 - » AA LR6 (1.5 V) Lithium Ion Batteries required. Use of other types of batteries, such as alkaline, will significantly decrease battery life.
- microUSB port for emergency power

**All battery life claims are approximate and based on a set configuration profile. Battery performance is based on pre-defined system settings such as battery chemistry and battery model used, credential presentation settings (LED/buzzer), UHF polling period, UHF status intervals, and operations per day. Actual battery performance will vary and depends on the factors above.*

4500C Electric Strike Complete Pac

Works with cylindrical and mortise locksets up to a 3/4" throw latchbolt

The low profile, heavy-duty, fire rated solution.

The 4500C Series Electric Strike is designed to maintain 1/2" drywall penetration even in a 2" UL 10C fire rated frame. The 4500C features a low profile 1-3/8" depth and heavy-duty stainless steel construction. Its strength is derived from a unique keeper pin locking design, enabling the 4500C to exceed the ratings of the frame, door and locking hardware. The 4500C includes two faceplates designed to accommodate either cylindrical or mortise locksets up to a 3/4" throw latchbolt.

Features

Standard Features

- Stainless steel construction
- Tamper resistant
- Static strength 1,500 lbs
- Dynamic strength 100 ft-lbs
- Endurance 1 million cycles
- Field selectable fail safe/fail secure
- Two faceplates provided to accommodate a variety of locksets
- Non-handed
- Internally mounted solenoid
- Accommodates up to a 3/4" [19mm] latchbolt
- Strike body depth 1-3/8" [34.9mm]
- Plug-in connector
- Trim enhancer
- Full keeper shims for horizontal adjustment
- SecuriCare five-year, no-fault, no questions asked warranty (Addition of SMART Pac® III extends the warranty to 10 years)

Optional Features

- **LBM** Latchbolt monitor
- **LBSM** Latchbolt strike monitor

Accessories

- **4500-105** Trim enhancer - black
- **4500-110** Replacement strike plate
- **4500-131** Filler block - 7/16" [11mm]

5000 Electric Strike

*Works with cylindrical locksets
up to a 5/8" throw latchbolt*

Also available in
a Complete One
Box Solution

The Grade 1, low-profile solution for cylindrical locksets.

The 5000 Series Electric Strike is a compact, high performance electric strike designed for low profile openings where there is limited space behind the jamb. Its strength is derived from a unique keeper pin locking design, enabling the 5000 to exceed the ratings of the frame, door and locking hardware. This field selectable fail safe/fail secure unit is easy to install and accommodates latchbolts up to 5/8" throw.

Preload

What is Preload?

When pressure is applied to some models of electric strikes, the solenoid may not have the ability to mechanically release the keeper because the pressure binds it against the latch. Even a small amount of this preload can cause problems in the functioning of some electric strikes. Door preload can prevent the smooth unlocking of the electric strike or even disable a strike – preventing a door from being opened.

Preload and Building Security

An electric strike failing to release when energized is not the only problem preload can cause.

If the power to the electric strike is interrupted, either by accidental or deliberate means, strong preload pressure can cause a strike in fail safe mode not to function.

If a serious preload condition is present when the strike is activated, the pressure will move the door slightly into an open position, leaving the door unlocked and the building vulnerable.

Some of the underlying problems that cause door preload, such as pressure from air conditioning, are not practically or easily corrected.

What Causes Preload?

A number of conditions can cause door preload including:

- Stack pressure caused by HVAC systems
- Misaligned strike and lockset
- Warped wood doors; damaged or bent metal doors
- Thick door seals or heavy weatherstripping

A strike that does not open or opens only intermittently could be showing signs of a preload problem. If preload pressure causes a strike or multiple strikes to malfunction, many access and security issues may arise.

7000 Electric Strike

Works with cylindrical latchbolts up to 5/8" throw and rim exit devices up to a 3/4" throw

Also available in a Complete One Box Solution

The dual, preload solution for cylindrical latchbolts and rim exit devices.

The 7000 Series Electric Strike offers two solutions to address preloaded doors. The in-frame adjustable feature allows the installer to easily adjust the electric strike opening to accommodate the horizontal position of the latchbolt after installation.

The preload release function allows the electric strike to operate smoothly throughout the year under varying loads on the door caused by air conditioning pressure, changes in the weather, warped doors or doors with weather stripping that may often bind standard electric strikes. This unit accommodates cylindrical latchbolts up to 5/8" throw and rim exit latchbolts up to 3/4" throw.

7501 Electric Strike Complete Pac

*Works with cylindrical locksets
up to a 3/4" throw latchbolt*

Also available in
a Complete One
Box Solution

The Grade 1, fire rated, preload solution.

The 7501 Series Electric Strike is ideal for fire rated applications with preload conditions caused by a warped or misaligned door, weather stripping, a smoke seal or any other condition that could cause door bind. The heavy duty stainless steel construction provides the strength and durability required to accommodate fire rated latchbolts up to 3/4" throw.

Features

Standard Features

- Stainless steel construction
- Tamper resistant
- Static strength 1,500 lbs
- Dynamic strength 70 ft-lbs
- Endurance 1 million cycles
- Field selectable fail safe/fail secure
- Accommodates preload (up to 15lbs: fail secure only)
- Non-handed
- Internally mounted solenoid
- Strike body depth 1-11/16" [42.86mm]
- Plug-in connector
- Trim enhancer
- SecuriCare five-year, no-fault, no questions asked warranty (Addition of SMART Pac® III extends the warranty to 10 years)

Optional Features

8000 Electric Strike

Works with cylindrical locksets and accommodates latchbolts up to 5/8" throw

Also available in
a Complete One
Box Solution

The concealed electric strike solution for cylindrical locksets.

The 8000 Series Electrical Strike is a compact, high performance electric strike featuring a unique concealed design for use with cylindrical locksets. No cutting on the frame is required. Simply remove the existing strike plate, adjust the vertical alignment feature to the latchbolt centerline and install. Its strength is derived from a unique keeper pin locking design, enabling the 8000 to exceed the ratings of the frame, door and locking hardware. This field selectable fail safe/fail secure unit is easy to install and accommodates latchbolts up to 5/8" throw.

Reduce your install time by evaluating your opening

The 8000/8300 Electric Strikes can be adjusted to compensate for frame and door irregularities. Sometimes, adjusting the frame and door back to industry standards is not an option. Here are some tips to quickly compensate for frame twist and determine the condition of the latchbolt.

Measure Frame Twist

One way to measure frame twist is to place a carpenter square on the stop and the face of the door. If the angle is less than 90 degrees, the 45 degree ramp angle of the 8000/8300 is steepened and may need to be corrected as shown (Figure 1).

We recommend you check the condition of the latchbolt prior to installing the 8000/8300. Poorly constructed, worn out or damaged latchbolts may not slide along a ramp at any angle. To check the condition of your latchbolt, we recommend applying a slight force to the tip of the latchbolt (about 45 degrees to the door face). Make sure the latchbolt can be pushed up into the door.

Compensate for Frame Twist

When a frame is twisted, the relationship between the face of a closed door and of the inside face of the frame (i.e., rabbet) may not meet the 90 degree industry standard. Untrue frames and doors impact latchbolt wear and the force required to exit, so we recommend you ensure that the angle is between 90–95 degrees.

If manipulating the frame is not possible, we recommend placing several shims included under the top and bottom (stop side) of the faceplate (Figure 2). This effectively increases the 8000/8300 ramp angle and compensates for frame twist. You can also compensate for frame twist by placing shims under the top and bottom (bevel side) of the latchbolt (Figure 3).

8500 Electric Strike

*Works with mortise locksets
without a deadbolt up to
a 3/4" throw latchbolt*

Also available in
a Complete One
Box Solution

The fire rated, concealed electric strike solution for mortise locksets.

The 8500 Series Electric Strike is a fire rated, compact, high performance electric strike featuring a unique concealed design for use with mortise locksets without a deadbolt. Designed for fast, convenient installation, the 8500 installs with little or no modification to the frame. Simply remove the existing strike plate, remove the dust box, and install. Its strength is derived from a unique keeper pin locking design, enabling the 8500 to exceed Grade 1 ratings. This unique electric strike complies with NFPA 80-07 guidelines for retrofit into fire rated frames. The 8500 accommodates mortise latchbolts up to 3/4" throw.

8500 Series Faceplate Option Kits

The 8500 faceplate option kits combine two different faceplate pocket styles with three different deadlatch platform profiles for compatibility with a wide variety of mortise locksets. 8500 faceplate option kits are lock specific. There are two faceplates included in each kit: a standard faceplate and a faceplate with a wider pocket to address less-than-ideal sagging door conditions.

Get to Know the 8500

The 8500 concealed electric strike for mortise locksets builds on the tradition of ground-breaking design you've come to know in the 8000 Series concealed electric strike family. It has a unique design unlike any electric strike on the market today. It's important to understand the extraordinary design of the 8500 so that you can correctly install and operate it.

When the door is closed, the mortise latchbolt is held secure by the 8500 keeper. A 'deadlatch platform' insert holds the deadlatch in its locked state. Place the deadlatch platform into one of three locations in the strike as appropriate for the type of mortise lockset.

When the electric strike is energized, the keeper begins to rotate and the deadlatch platform falls away, allowing the deadlatch to drop and the latchbolt to become locked.

As the door moves forward, the latchbolt slides first along the keeper and then up the internal ramp.

As the door continues along its arc away from the frame, the latchbolt and deadlatch exit the 8500, which quickly returns to its locked state.

UNL UnLatch® Strike

*Works with most cylindrical locksets
up to 5/8" throw latchbolt*

The universal compact, high performance, no cut electromechanical motorized electric strike for use with cylindrical locksets.

Designed for easy installation, the UNL is capable of releasing under preload conditions and accommodates latchbolts up to 5/8" throw. Strong enough to withstand windstorm conditions, the UNL is the UL listed, fire rated electric strike that includes lock monitoring standard and provides ANSI/BHMA Grade 1 holding power.

9400 Surface Mounted Electric Strike

*Works with rim exit devices
up to 1/2" throw latchbolt*

The slim-line, surface mounted solution.

The 9400 Series Electric Strike is a slim-line, surface mounted electric strike designed to accommodate rim exit devices with a 1/2" throw Pullman latchbolt. All components are completely encased within its 1/2" thick stainless steel housing, so no cutting on the frame is required for installation. Simply place the electric strike on the surface of the frame, align it with the exit latchbolt, and install.

An 1/8" spacer plate is provided to accommodate varying door gaps. The 9400 exceeds Grade 1 standards for strength and performance. It is field selectable for fail safe/fail secure operation, and for 12 or 24 VDC. The 9400 features a smooth cover to conceal the mounting screws and provide a sleek surface for superior looks.

9500 Surface Mounted Electric Strike

Works with rim exit devices up to 3/4" throw Pullman latchbolt

The durable, fire rated surface mounted solution.

The 9500 Series Electric Strike is a three hour fire rated, surface mounted electric strike designed to accommodate rim exit devices with a 3/4" throw Pullman latchbolt. All components are completely encased within its 3/4" thick stainless steel housing, so no cutting on the frame is required for installation. Simply place the electric strike on the surface of the frame, align it with the exit latchbolt and install. Adjustments have never been easier as the base is now separate from the cover.

The 9500 exceeds Grade 1 standards for strength and performance. It is field selectable for fail safe / fail secure operation, and for 12 or 24 VDC. This unique electric strike complies with NFPA 80-07 guidelines for retrofit into fire rated frames.

9800 Surface Mounted Electric Strike

*Works with Adams Rite® Starwheel®
and Interlocking rim exit devices*

The low-profile, surface mounted electric strike designed to accommodate the Adams Rite 8700 and 8800 Series Rim Exit Devices.

The 9800 Series Electric Strike exceeds Grade 1 standards for strength and performance. All functions are performed within the 1/2" thick strike body, which is protected by a sleek stainless steel cover to conceal the mounting screws and provide the most aesthetic appearance. All while being field selectable for fail secure or fail safe operation, and dual voltage, 12 or 24 VDC.

1/16" and 1/8" spacer plates are provided to accommodate varying door gaps. Simply place the electric strike on the surface of the frame, align it with the Starwheel or Interlocking latchbolt, and install.

Folger Adam 310-4 Electric Strike

Works with Pullman style latchbolts up to 3/4" and Squarebolt® style rim exit devices

310-4

310-4S

The 310-4 is a 3-hour fire rated, industrial grade electric strike designed for extreme heavy duty applications.

The all stainless steel construction of this device makes it ideal for high abuse applications that would disable other electric strikes. The Folger Adam 310-4 Series has a unique 3/4" face plate with an integrated 1/4" base shim that can be removed in the field to accommodate rim exit devices with a 1/2" or 3/4" throw latchbolt.

Features

Standard Features

- Integrated shim for quick customization of faceplate thickness (1/2" to 3/4" [19mm])
- Tamper resistant, heavy duty construction
- Constructed entirely of stainless steel for strength and corrosion resistance
- Static strength 1,500 lbs
- Dynamic strength 70 ft-lbs
- Endurance rating 1 million cycles
- Integrated ramps for better deadlatch handling
- Set screws for horizontal lockdown
- In-frame horizontal adjustability
- Wider faceplate for greater versatility
- Non-handed
- Fail secure (standard)
- Plug-in connector
- SecuriCare five-year, no-fault, no questions asked warranty (Addition of SMART Pac® III extends the warranty to 10 years)

Optional Features

- **Fail Safe**
- **LCBMA** Latchbolt & Locking Cam Monitor with Auxiliary Switch

	310-2-3 Astragal strike latch guard	Designed to prevent tampering with the latchbolt, and the latchbolt keeper. Prevents one door from being opened before the other.
	2001-1 Wire-in bridge rectifier	- Converts AC to unfiltered DC. Rated 35 V, 2 Amp. - Not recommended for 1006 Electric Strike.
	2001M Plug-in bridge rectifier	- Converts AC to unfiltered DC. Rated 35 V, 1 Amp. - Includes MOV and self-resettable fuse - Not recommended for 1006 Electric Strike.
	2004M ElectroLynx® adapter	Adapter between existing electric strikes and ElectroLynx® connectors.
	2005M3 SMART Pac® III <i>Addition of Smart Pac to any electric strike extends the 5 year no-fault warranty to a 10 year no-fault warranty.</i>	- In-line power controller able to receive input voltages from 12- 32V AC or DC. Built-in bridge rectifier. Reduces initial voltage by 25% to extend the life of the electric strike. - Includes built-in resettable fuse, MOV, voltage regulation and input voltage level indicating and unit status. - For use with 1006, input voltage must be DC.
	2006M Plug-in buzzer	Audible operation indicator at 24 VDC, 75db at 11-3/4".
	2007M Plug-in pigtail connectors	With 4" wire leads.

NOTE: This chart is offered as a convenience only. Reference should be made to the individual manufacturer's catalogs for complete data as to exact equivalents. There may be some variation in physical size, electrical characteristics and durability between strikes of different manufacturers. HES assumes no liability for differences between items compared. When compatibility is a concern, contact Customer Support at 800-626-7590 for application assistance.

NOTE: The 109 trim adapter may be required for a neater appearance in retrofit applications where the strike lip dimensions exceed 3-3/8" [85.725mm].

NOTE: This chart details the and Folger Adam products that can replace competitors products but not necessarily the reverse.

K100 Series Cabinet Lock

Integrated Wireless Electronic Access Control Cabinet Lock with Aperio® Technology

The flexible integrated solution for extending access control to secure lockers, drawers and doors.

The K100 Cabinet Lock comes standard with locked state and tamper monitoring, optional mechanical key override and over 150 lbs of holding force.

The K100 supports HID® multiCLASS SE® contactless credentials. It uses local wireless communication between the lock and an Aperio hub to bring access control to cabinet doors and drawers where audit trail and real-time monitoring are required.

NOTE: The K100 Cabinet Lock is available as either a pre-paired lock and hub kit (no certification required) or as a field configurable component (requires Aperio® Certified Integrator certification). Pre-paired kits support limited features. Field configured devices are required in order to support all options. Visit IntelligentOpenings.com to learn more.

Features

Standard Features

- For use with swinging and sliding cabinet doors and drawers with a door thickness of up to 2-1/4"
- 2.4 GHz Aperio wireless technology
- Supports HID multiCLASS SE® card technologies
- Supports HID NFC & BLE mobile access credentials
- Integrates with existing access control systems and ID badges
- Audit trail limited by EAC system
- LEDs indicate valid/invalid entries; Red/Amber or Green/Amber
- Integrated locked state and tamper monitoring
- Automatic relock when door is closed and secure
- Non-handed
- Black finish
- Three optional shaft lengths to accommodate up to 2-1/4" door thickness
- SecuriCare three-year, no-fault, no questions asked warranty

Terms & Conditions

PRICES: All prices are subject to change without notice. Prices listed on the HES website will serve as the most current list price. All shipments will be made at prices in effect at the time of shipment. The customer shall be responsible for payment of all applicable sales and/or use taxes and freight costs.

MINIMUM ORDER: Minimum product charge per invoice is \$150.00 USD.

PAYMENT TERMS: Net thirty (30) days from date of invoice. Interest at the rate of up to 1-1/2% per month may be charged on all past due accounts. An order received on an account which has not been paid within 45 days of the date of invoice may not be processed until the account is current. Custom orders may require a deposit.

DELIVERY TERMS: All prices are Ex-works factory. Purchaser assumes the risk of loss or damage to the goods while in transit from the point of shipment. HES reserves the right to make delivery in installments. Installments shall be separately invoiced and paid for when due. Delay in delivery of an installment shall not relieve the purchaser of its obligation to accept remaining deliveries.

SHORTAGE: Any claim for shortages must be made to HES in writing within one (1) week of receipt of merchandise.

WARRANTY RETURNS: A Customer Care Form (CCF) for defective product must be obtained from HES before any merchandise can be returned. CCF's are valid for sixty (60) days from date of issuance. Goods returned under the terms of MagnaCare® and SecuriCare® Warranties may require a copy of the original invoice.

RETURNS: A Customer Care Form (CCF) must be obtained from HES before any merchandise can be returned. CCF's are valid for sixty (60) days from date of issuance. Items that are not factory sealed, or that are returned later than 90 days from the date of receipt are subject to a restocking charge plus an additional charge for any damage.

CANCELLATIONS: Any order may be subject to a 5% cancellation charge for catalog items. Cancellation of non-catalog or custom items will be subject to a 20% cancellation charge plus all costs (both direct and indirect) incurred by manufacturing at the point of cancellation that are properly allocated to the cancelled item(s).

LIMITATION OF LIABILITY: Neither party will be liable to the other for any delay or failure in performance arising directly out of war, sabotage, insurrection, riot, and any other act of civil disobedience, act of public enemy, fire, explosion, flood, storm, or other act of God or nature, or similar cause beyond its reasonable control, including shortage or unavailability of labor or materials. If, notwithstanding the foregoing limitations, HES has any liability to the purchaser, the purchaser agrees that the total liability to the purchaser for all losses, damages, and causes of action, whether in contract, equity, tort (including without limitation, negligence and gross negligence), or otherwise, will not exceed the amount the purchaser paid to HES for the products (including, without limitation, incidental or consequential damages, damages for lost profits or business interruption, and punitive damages).

NO THIRD PARTY LIABILITY If the purchaser uses the HES Products on behalf of others or provides to others any products referenced herein, the HES Parties shall have no liability to such persons whatsoever, and the purchaser agree to defend and indemnify the HES Parties from any and all claims and demands asserted against them, and from any legal fees, costs and other expenses that the HES Parties incur therewith.

Warranty Policy

We believe that the best products in the industry should be supported by our commitment to deliver the highest quality products and services. HES is proud to extend the most comprehensive no-fault, no-questions asked warranty coverage to all of our products and solutions. This is our expectation and commitment to you – our valued customer.

SecuriCare 10-year Warranty

Duration: Ten years from date of shipment

Condition: Any reason including, but not limited to, installation error, vandalism or force majeure.

Replacement: Replacement product or equivalent shipped at HES expense.

When installed with a Smart PAC III, the following electric strikes are upgraded to the 10-year warranty:

- 1006, 1500, 1600, 4500, 5000, 5200, 7500, 8000, 8300, 8500, 9400, 9500, 9600, 9700, 9800
- Folger Adam 310, 712, 732, 742

Check your individual product to determine warranty coverage. Batteries and consumables are not covered by HES Warranty programs. Replacement products, at HES's sole option, may be the identical item or a unit which serves as a functional replacement. If the customer has an account with HES or a valid credit card, the customer may order an advance replacement product, whereby HES will charge the customer's account for the price of the product plus next day air freight, and will credit back to the customer the full amount of the charge, including outbound freight, upon HES's receipt of the original product from the customer. HES's sole and exclusive liability, and customer's sole remedy, is limited to the replacement of the HES product when delivered to HES's facility (freight and insurance charges prepaid by customer).
